Urine Analyzer

- **MICROALBUMIN - CREATININE**

Microalbumin excretion is the first sign of renal disease or damage. Creatinine excretion is constant in urine. Thus, albumin to creatinine ratio (ACR) is the recommended test by the American Diabetes Association.

For over 25 years, Teco Diagnostics has been an industry leader in the manufacturing of in-vitro clinical diagnostic tests and instruments. From powder to liquid clinical chemistry, we have high quality solutions for your diagnostic needs. Based in Anaheim, CA, our manufacturing facility is FDA regulated, and thus all phases of our production processes are based on strict Current Good Manufacturing Practices (cGMP) regulations which safeguard the excellent quality of all our products.

FDA Registered and cGMP
Compliant Manufacturer
ISO 13485:2016 Certified
